

DTEND= --> DTEND:

Posted by larsx2000 - 03 May 2015 21:43

Hi,

when exporting ics the Z at the end is now (Version 3.4 BETA) fixed. Thanks for that.

But the DTEND now has a = where a : is needed. This results in my ical client interpreting the events being just one hour long.

Hi Lars,

Thank you for your message. I didn't make any intentional changes to the ICS export, so I'm surprised you noticed any changes.

When I start working on Roster2Outlook again, I'll look at it.

Nils
