

Easyjet problem

Posted by sallet - 17 Oct 2017 15:01

Hi, R2O seems to be hanging at the moment when downloading the latest roster. I notice the easyjet connected portal has changed with Check-In being moved down the page, not sure if that's the reason.

Hi Nils,

Thanks for your efforts, its working again for me too. Couple of things I thought I'd ask. The appointments created in Outlook now show as Free rather than Busy. Is that something R2O controls or do I need to look for that default setting on my outlook?? Also, the end duty time doesn't appear to be created.

Thanks again,

Stu

Hi Stu,

It's been a while, and I don't know if you still use Roster2Outlook after all the problems, but since the last AIMS update by easyJet this week, the last version should be working again for easyJet crew. I even released a small update today, as someone else reported that All Day Events were not ignored when selecting this option, that's now fixed as well.

Answering your questions, Roster2Outlook tries to overwrite the default Outlook settings for busy/free time. For duties Roster2Outlook is assigning it as busy, while All Day Events are saved as free time. With the last version this works for me, if this is still different for you, let me know, it could be an Outlook setting.

When you refer to the End Duty Time, do you refer to the option to include this in the subject? This option is working fine for me. If you are referring to something else, please let me know if you're still interested.

Nils
