

Easyjet problem

Posted by sallet - 17 Oct 2017 15:01

Hi, R2O seems to be hanging at the moment when downloading the latest roster. I notice the easyjet connected portal has changed with Check-In being moved down the page, not sure if that's the reason.

Hi Nils,

I deleted previous files and saved the new one. The strange thing is that the program did recognise me and my id's already, but when trying to download the roster i have a "no answer message". Not sure the reason

Thanks for trying !

Just tried the new version but it hangs at 1% so no joy! Thanks for the efforts!

Hi All,

I think I know why it wasn't working for you. I hard coded the new server in my settings, but didn't make Roster2Outlook change it. So this version was still using the old server unless you manually changed it in the registry.

I've just uploaded an update that will update the server in your settings, and I really think this should work.

Let me know!

Hi Nils,

Just downloaded latest version and it's downloaded and exported without issue!

Many Thanks - glad to get it back!

Zoe.

I too have just downloaded it and seems to work perfectly. Really appreciate this Nils.
