

Easyjet downloads stopped working

Posted by sallet - 30 Jul 2018 16:08

Hi, haven't downloaded since the new roster came out in the beginning of July but I'm trying to download and update and the download gets to 98% before timing out. Its trying to download 10 parts and I've noticed that more and more old rosters are being downloaded despite the setting being from the beginning of the month which shows 1/7/2018. Any reason you can think of?

Hi Nils,

Thanks for keeping this going. It is just so useful for friends and family.

I have been using CMR for a little while now and it is a superb product. Doesn't load my roster to Outlook though.

Thanks again

Hi All,

Sorry it took so long, but something else was changed, so my solution didn't work anymore. However, found another fix and uploaded a new version (4.2.8267) to the website. Hopefully this will keep working for a while.

Indeed, there are still some things I'd like to see from R2O in CMR, hopefully I can convince them to add some of those things!

Let me know if this version works for you.

Nils

Thanks Nils.

I've just tried it and all works very well again.

There is only a small niggle for me and that is all day events (such as days off) keep showing in Outlook even though I've ticked "Skip all day events". Only a minor thing and I wouldn't like you to spend any time on it, just wanted to report it really. It never used to happen though...

I'm so grateful for this Nils, the whole family can see what I'm up to and they can even check for themselves without acknowledging changes. Brilliant!

Cheers - Chris

Hi Chris,

With the introduction of PDF rosters, Roster2Outlook stopped working completely, as it is unable to process PDF files. However, with the last AIMS update easyJet did this week, the HTML roster is back, so the last version of Roster2Outlook is working again (for easyJet crew).

I've looked into your problem with All Day Events, and made a small change so this works again in the new version that is now online (4.2.9000).

Let me know if you still have issues.

Nils

Hi Nils

Just tried this new version and at first ran into an "exception error" where it complained that it could not find the path to folder: C:\Users\Chris\AppData\Local\Roster2Outlook. That folder didn't exist so I created it and it now works very nicely. The all day events issue is now fixed and are now being skipped. Thank you so much for this Nils. At least some positive news after the rather heavy-handed blocking of CMR by my company. This particularly helps my immediate family.

I hope flying and life in general is going well for you.

Cheers

Chris
